Subject: BULK WATER SUPPLY MAINTENANCE 23 to 28 JUNE 2025 PLEASE SAVE WATER

Release: Immediate

18 June 2025

Swartland Municipality

BULK WATER SUPPLY MAINTENANCE 23 to 28 JUNE 2025: PLEASE SAVE WATER

From Monday 23 June 2025 to Saturday 28 June 2025, the West Coast District Municipality will be performing critical maintenance on a bulk water supply line.

This will interrupt bulk water supply to ALL Swartland Municipality's reservoirs (except Moorreesburg and Koringberg). Swartland Municipality will take every necessary step and precaution to provide adequate water supply to residents during this time. All reservoirs will be filled before the start of maintenance period. We do need the FULL cooperation of every resident during this time to use water carefully and sparingly. Failure to adhere to this request will result in water shedding during this period.

During this week we ask that residents DO NOT

- Water gardens with municipal potable water sources
- Fill Swimming Pools
- Wash vehicles with municipal potable water.
- Wash any hard surfaces such as walls, floors and driveways with municipal potable water.
- Flush toilets unnecessarily

Please carefully manage your water usage at home, school and at work.

If all residents cooperate with these simple measures, it will not be necessary implement water limiting measures during this time.

Please share this information with your household, neighbours and friends. Your cooperation

during this time is much appreciated.
